In the past, our summer birthdays were always announced at the September meeting. We felt that they deserved their own month of recognition so Michele Bibb and I will be sending out a special June, July and August Birthday edition of the NSARTA NEWSLETTER. If by chance we miss someone, please email me and we will add you to the next month.

Linda Nolder will continue sending e-cards or birthday cards for those without emails, to our summer members as she did during the year.
Happy Birthday June Babies!! According to “1st Story Parenting” and “Just Web World”, people born in June have 2 birthstones, pearl and Alexandrite, and 2 zodiac signs, Gemini and Cancer. They are full of ideas and are fast thinkers wanting to know the “how and why” of everything and prefer having things done their way. June babies are honest and expect others to be the same. They have to learn how to manage their expectations and deal with disappointments. If they feel someone is being fake, they will quickly distance themselves from them. They have extremely outward, extroverted personalities which makes them very social; in fact, they are known as the “social butterflies” of the zodiac. They are charismatic, stylish, fashionable and enjoy the finer things in life. They are known to become the glue that holds their circles of friends together. One of their dominate traits is a sense of wonder and adventure which makes them risk takers and exceptional leaders. However, some people just don’t “get” their unique sense of humor and their way of “looking at things”.

Famous people born in June include Queen Elizabeth, Burl Ives, Donald Trump, Dean Martin, Morgan Freeman, and Stan Laurel.

A very Happy Birthday to our June Birthday members:

Adele Murphy, Joe Harber, Kathleen Shelton, Mary L. Martinez, Dolores Ramon, Candido Colunga, Ledru Barker, and Cynthia Hartley.
